Completion of the VEE Applied Statistics topic requires coverage of both regression and time series. Therefore, two approved courses/experiences may be required to complete the applied statistics VEE topic requirement. An approved regression option may be paired with any other approved time series option offered by a university or an alternate VEE provider. The "Additional Requirements" column indicates which component of the VEE topic that specific course satisfies. If it states "No additional requirements", then that course will satisfy the complete VEE topic. FAQs are posted on the VEE Web page for information about adding options to the directory or extending the approved timeframe for options currently listed. Contact vee@soa.org if you have additional questions.
